

Who Painted the Penguin?

Do you know anything about PENGUINS? The Emperor Penguin is the largest and perhaps most beautiful: a striking black and white, with orange hues at the neck.

Emperor Penguins

There are many kinds of penguins in various sizes, but ALL are basically **black & white**. How boring! So why black and white? Because it is the **perfect camouflage** to hide them from predators when swimming — dark when looking down into the inky blackness, and **light** when looking up against the **ice**.

What kind of animals are PENGUINS ??

They're not... They're **BIRDS!**

They can't fly at all, but they

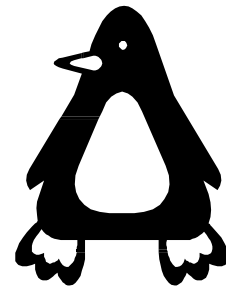

do "fly" through the ocean

— and perform amazing acrobatics —
as easily as birds fly through the air.

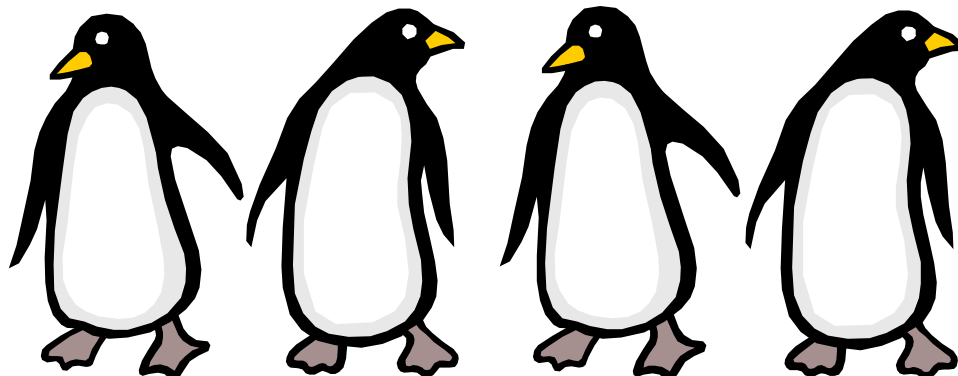

Do POLAR BEARS eat penguins?

NO - Polar bears are from the Arctic in the north.

Penguins live around the Antarctic in the south.

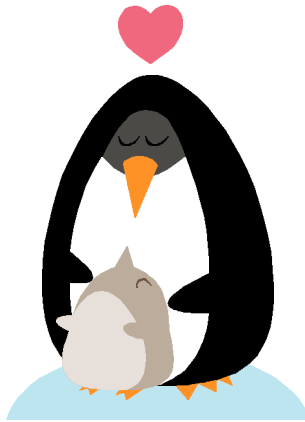

Penguins live a very hard life. They use a few **rocks** to build their nests, they live in **extreme cold** — and they walk & swim **hundreds of miles** to fetch food. **Yet they not only survive, they THRIVE...**

Some of us have hard lives too — broken homes, no money, little food, loneliness. And some seem to have great lives — pizza when they want it, fancy clothes, all the latest gadgets & toys, lots of friends, and comfort in general.

But whether we are in need or we are richly blessed, **we all need God**. He is the **basic provider** of everything. He may not give us everything we want, but He gives us everything we need.

The penguins struggle through hardship, but God gave them the ability, protection, and stamina to thrive in their environment. **He will do no less for us !!**

**"And my God will meet all your needs
according to His glorious riches in Christ Jesus."
— *Philippians 4:19***
